As One Garden Lover to Another

Let me express the appreciation we feel in having the opportunity of serving you. We present our Garden Book for 1929 with real pride, for it contains what we confidently feel is as fine an assortment of planting as can be found in any nursery in America. It is genuine pleasure to have you look through its pages, study the descriptions of the different varieties, and realize that here is real value in skrubs trees and flowers.

We trust our friends will look upon the book as our personal representative. It contains the story of our work for the year past, and for many years past—work which we have carried on because we love it, and because we want to share its results with garden lovers everywhere.

"Kentucky Bred"--- a Guarantee of Quality

There are flowers and flowers—and still more flowers. Almost anyone can grow them, in one fashion or another. But not everyone can produce the best ones—that's where the rub comes. That's why we ask you to take thought a moment and realize just what "Kentucky Bred" plantings bring you.

"Kentucky Bred"—that's our slogan. It means quality, high quality, in every respect. It describes the kind of plants and flowers we produce, the kind we can conscientiously recommend and supply to our customers. If it's "Kentucky Bred," the elass is there, whether it be women, horses, or flowers.

When in Louisville, Don't Fail to Call Upon Us

If ever you have the opportunity, come to see us. Nothing pleases us so much as to have visitors at the Schulz nurseries, for we know only a real interest brings them.

You will be entranced by our fields of magnificent flowering plants and growing shrubs. If it's "Dahlia Time," or "fris Time," or time when any other special flowers are in bloom, you will be delighted and charmed with the gorgeous and truly inspiring displays.

Remember, Schulz is always at your service. We want our customers to succeed; therein lies our greatest pleasure and satisfaction. We will help you to success, with every means at our command. We will gladly help you plan your plantings, select your specimens, advise you how to grow them best—serve you in every way. Only give us the chance, and we will show you how satisfactory a real flower service can be.

Learn to Know Dahlias

A World of Pleasure Awaits You

We specialize in Dahlias because to us they are the most beautiful of flowers. While others may not entirely agree with this opinion, it must be admitted that they are without doubt the most beautiful of late summer's flowers. No garden, no matter how small or how large, is complete without a fair representation of these most gorgeous blooms.

History of the Dahlia

From the years 1571 to 1577 a Spanish physician, one Hernandez, resided in old Mexico. Like other professional men of his time, his interests were broad. No doubt his practice was limited, for he found time to write an extensive work on the animal and plant life of the country.

Some years afterwards, one Reccho brought Dr. Hernandez's work back to Europe with him and published it in Rome. The book contained among other interesting and unusual descriptions of plant and animal life, a brief mention, description and illustration of the plant "Acoctil" His comments lead us to believe that the plant described was the Dahlia. It grew wild in the sandy soil of that country and in single form. This is the first

known reference to the flower.

In 1791, Cavanilles, another Spaniard and botanist of note published a technical botanical description of a flower he had grown from seed brought from Mexico. He called it "Dahlia Pinnatta," "Dahlia" after a young Swedish botanist, Andreas Dahl, who had been Cavanilles' student and who had died just two years previous.

Such was the start of the Dahlia in Europe. In the early part of the nineteent century the Dahlia was introduced into England and France and began to be extensively grown. From the single blossom of "Accetil" with its yellow disk center and searlet rays, the various forms of the Dahlia have developed until now we have not only single blossoms in a profusion of colors but a large variety of shapes and forms, each one in as many different colors. Each year brings added varieties from growers, each a new prize to treasure. The Dahlia has become the most loved of all late summer flowers. There is a shape and form for each taste and a color for every mood.

The Culture of the Dahlia

The Dahlia thrives in an open, sunny location, though they will succeed in partial shade in some instances. They will grow in any kind of soil, but a rich, sandy loam is the best. To enrich poor ground in the fall spade in wellrotted manure or decayed vegetation. Use bone meal at planting time, working it well into the soil. Spade the

soil thoroughly as deep as possible before the tuber is planted.

Decorativ

Planting. Dahlins are planted in the spring. It is safe to plant them any time after the danger of frost is over. They usually blossom in from six to eight weeks after planting time. It is a good plan to start planting early and plant tubers about one to two weeks apart up until the middle or late part of

Decorative and Peony-Flowered

May. When ready to plant place stout stakes at least three feet apart, four feet is better; then dig the hole shout six inches deep and place the bulb in a horizontal position with the sprout end two inches from the stake. Never stand the bulb on end. This method of planting is known as the "stake" method and is the most successful for general results.

Cultivation. For the most beautiful flowers cultivate often. Keep the soil loose around young plants. Do not permit it to bake or harden. After each rain cultivate them to keep the ground in good condition and prevent weed growth. Later in the season when the fine, silky roots come to the surface stop cultivation and put a mulch of some kind around the plant to retain moisture and protect the small roots.

Training the Plant. After several sprouts appear remove all but one or two from each plant. When they are sufficiently above the ground to show three or four leaves, pinch out the center stem. This will cause branches to grow from the laterals and produce a strong, bushy plant At this time they should be securely tied to the stake with twine or some soft material. Continue the tying as the plant grows so that it will not be broken down by wind or other causes.

For Large Blooms. For extra large blooms remove the first set of side shoots from the first bud with a sharp knife. This forces the plant life that would have gone into the two side shoots into the first bud, making an extra large flower, much larger and giving a good stem. For exhibition purposes disbud every side shoot down the entire length of the stalk. The one flower that you will get from the plant will be of gigantic size.

Forcing for Exhibition. To produce the finest flowers for exhibition purposes, plant three to five feet apart,

using a liberal amount of manure or fertilizers: cultivate frequently; apply fertilizer or manure, broadcast or liquid form, at each or every other hoeing, and disbud, making applications very effective for forcing apply when plants are in bud, making applications often, but do not use too much at a time. Apply nitrate of soda in crystal form on top of the ground, or in liquid form, using one table-

(Continued on page 6)

Cactu

DAHLIA TYPES-See Page 6

spoon of nitrate of soda crystals to a gallon of water, using sprayer or watering can.

When the flower-buds appear, only one bud should be allowed to come to maturity, enabling each branch to produce one exceptionally fine, perfect flower. The flowers, for quality, must not be allowed to receive the drenching rains or scalding sun when nearing full bloom and should be protected from such.

It is always advisable to cut flowers that are to be exhibited as late as possible at night when the dew is on them, placing them in water and keeping them as cool as possible over night, thereby enabling them to withstand handling, packing and transportation.

Watering. Use very little water until flowering buds appear, after which plants can be thoroughly watered about once a week. Soak the ground until moist at least six inches deep. Rake over the surface the following day. This conserves moisture and lets in air and sunshine.

Harvesting. As soon as the frost kills the foliage and the strength of the stalk recedes into the tubers, harvest your Dahlias. Dig them up carefully, do not pull them up. After removing the clump from the ground, shake gently to remove the soil that will naturally fall off, cut off at tops two or three inches from the clumps. Lay them in the sun and air for about an hour or two. Pack in a cool, frost-proof place having an average temperature of about 45 to 55 degrees. The cellar provides the best place for their storage. It is a good plan to insulate them from furnace and frost with burlap, paper or can-vas. This excludes the air and preserves an even temperature. This is very important, as bulbs will shrivel and dry up if not properly taken care of the

Dividing the Clumps. Divide the clumps in the spring. The dividing should be done carefully with a sharp kingle or coping saw and particular care should be taken to avoid the necks of the tubers. The eyes of the tubers are easily recognized. Out the tubers so that there is at least one eye on each division of the clump.

To Preserve Cut Flowers. Flowers should be cut late in the afternoon or early in the morning. Place tips of the stems in water for about twenty seconds while boiling on the stove and immediately plung the tips delpinto cold water. If blooms droop prematurely place stems deep in hot water and allow them to remain unit the water cols. This will usually revive them. A pinch of salt in the water helps.

Classification of Dahlias. We follow the classification of Dahlias as adopted by the American Dahlia Society. Under the different headings and classifications the names and their application as recently defined by the American Dahlia Society follow:

Single. Open-centered flowers, small to very large, with 8 to 12 floral rays (petals) more or less in one circle, margins often decurved or revolute (turned down or backward).

Collarette. Of single type, with not more than nine large floral rays, but with a circle of smaller, narrower, usually different colored, rays standing at base or in front of larger rays and forming a collar between them and open center.

Duplex. Semi-double flowers; center almost exposed

on opening of bud, rays more than twelve, in more than one circle, long and flat, or broad and rounded, not noticeably twisted or curled. Many Dahlias previously classed as Peony - flowered belong here.

Peony-flowered. Flowers are semidouble, having two, three or more rows of broad, flat, loosely arranged rays or petals, surrounding an open center, which is usually a conspicuous golden-yellow, the inner floral rays being usually curled or twisted, the outer rays either flat, or more or less irregular. Sometimes the rays are pointed, occasionally they curl and twist over the center.

Decorative. Double flowers, full to the center, early in the season at least, flat rather than ball-shaped, with broad, flat, somewhat

Ball Shaped, Double. Full to the center.

(A) Show Type. Flowers globular or ball-shaped, rather than broad or flat, full to the center, showing regular spiral arrangement of florets, with floral rays or petals more or less quilled or with their margins involute (rolled forward or inward) and rounded tip (Dahlias of this type with flowers spotted, variegated or parti-colored, were formerly classed as Faney, a group no longer recognized).

(B) Hybrid Show, Giant Show or Colossal Type. Flowers fully double, broadly hemispherical to flatly globular in form, loosely built so spiral arrangement of florets is not immediately evident; floral rays broad, heavy, cupped or quilled, with rounded tips and more or less involute margins. Verging toward the Decorative Class and sometimes found classed with the Decoratives. (C) Pompon Type. Same shape and form as A and B, but flowers must be under 2 inches in diameter.

Cactus. Double flowers.

(A) True Finted Type. Flowers fully double, floral rays or petals long, narrow, incurved or twisted, with sharp, divided or fluted points and with unrights evolute (rolled backward or outward), forming in the outer florets a more or less perfect tube for more than half the length of the ray or petal.

(B) Hybrid Cactus. Flowers fully double, floral rays (petals) short as compared with previous type; broad, flat, recurved or twisted, not sharply pointed except when tips are divided (staghorn), margins only slightly revolute, and tubes of outer florets less than half the length of the ray or petal. This type intergrades with the Decorative and Peony-flowered classes.

We are indebted to the Bulletin of the American Dahlia Society for some of the information printed above. If you want to keep up-to-date on Dahlias join the American Dahlia Society. Write us for particulars.

Schulz Special Spring Catalog

Each year, about the last part of June or early part of July, we get out a special catalog of bulbs for fall planting. While smaller than the regular "Kentucky Bred" Garden Book, still it is a beautiful little catalog full of money-saving hints and timely suggestions for planting. Don't fail to send for it during the summer. Get the latest low prices on spring flowers.

Announcing the New Schulz Flower Store

BuyING habits of people change almost over night. A great many businesses have been entirely reorganized because of this particular trait of humankind. We get started on one thing when along comes something new which changes our lives completely.

We had this brought very close to us just lately. For very many years we had our shop at 550 South Fourth Avenue, Louisville. There, years ago, people came to the shop for flowers, or people dropped in to pick out pieces for parties or funerals. It was thought necessary for success that a florist business must be located as centrally as possible. But with the increasing use of the telephone and automobile, buying habits of people have changed in a marvelous way. More and more people ordered flowers over the telephone, and our trade came not only from people who happened to live near the downtown Louisville, but from people who lived on the outskirts, who drove down to choose flowers

Another difficulty arose—the question of parking while shopping in the downtown district. Accordingly, after long deliberation, we are leaving our location on Fourth Avenue, have leased our property there and have built a model flower shop and greenhouses out on Bardstown Road, on one corner of the Schulz Dahlia Farm, a short drive from the center of Louisville.

We can deliver now as quickly to nearly every part of town as we could when we had our central location. Furthermore, our friends who come to see us now can choose nursery stock

right from the fields as easily as they chose flowers from vases in the downtown shop.

The illustration above shows our building completed. Please note

we are all dressed up for Christmas with signs on the windows advertising Christmas wreaths. Hundreds of motorists driving by have stopped to buy their Christmas decorations here this year.

You can get an idea from this illustration of the beautiful architecture of this building. The green-houses attached are the finest and most modern in our vicinity. They are big enough to care for our needs for quite a while, and naturally the land provides for necessary expansion as business continues to grow. The main floor of this building is given over to reception hall and sales floor; the second floor is given over to the offices of the Jacob Schulz Co., Inc., where your letters go, where your orders are entered and where supervision of the machinery which supplies you with "Kentucky Bred" flowers is carried on.

We heartily invite you to see our new home. We are immensely proud of it and welcome the opportunity to show it to you. Be sure to come and see us when you are in Louisville.

There's Pleasure and Profits in Growing "Kentucky Bred" Dahlias

Perhaps you have always thought of Dahlias only in terms of pleasure to yourself and family. There are many women and men too, who grow Dahlias for the extra money they receive from the sale of cut plants and even from the tubers their friends and neighbors buy. One of our customers, Mrs. A. A. Morrow, of Zanesville, Ohio, is growing Dahlias for profits as well as for the pleasure she gets out of a beautiful garden. Mrs. Morrow says of "Kentucky Bred" Dahlias:

"The bulbs I purchased from you were wonderful."

Here is a picture of Mrs. Morrow's Dahlia Garden.

KENTUCKY CARDINAL

One of our own original "Kentucky Bred" Dahlias originated by Mr. G. E. Schulz. A remarkable Dahlia. As charming and vivacious as the bird whose name it bears.

Garden and Home Builder says of it:

"At last someone has fittingly used the name made famous by James Lane Allen. It is fitting that a Kentucky originator has chosen this name for a good Dahlia. Kentucky Cardinal won the American Dahlia Society Certificate of Merit in 1920. It is a bright scarlet Decorative that holds its color under sunshine, and an excellent grower. This is the first time a Kentucky origination has got into the Honor Roll." We have a limited stock this year and are offering it in our catalog.

JERSEY'S BEAUTY

The only true pink Dahlia. Dahlia enthusiasts are particularly fond of Jersey's Beauty because of its remarkable color. Most pink Dahlias have a slight tinge of lavender in their petals. Jersey's Beauty is true pink, almost entirely free from the lavender tinge. The color is a lovely rose pink. The blooms are large and of true decorative type. Well pointed and artistic in proportion. It has extra fine stems. Our extensive growing facilities and our exceptionally large stock make it possible for us to offer this Dahlia for \$100 each

DECORATIVE DAHLIAS — Continued

419. MARGARET WOODROW WILSON. Color, an opalescent pink, face of petals creamy white with a phlox pink reverse \$2.50 cals.

197. MARY C. BURNS. This is truly a wonderful Dahlia. The outside of the petals is old gold and the reverse duil red. This combination of red and gold is new and immediately attracts attention. The size is enormous, but the coloring is what makes the blossoms so unique....\$1,00 each

Dahlias Large as Dinner Plates

October 25, 1927.

I received my dahlia bulbs and surely had some wouderful blooms. Some large as small dinner plates. Please send me your 1928 catalog, as I want more bulbs this spring. Thanking you for the nice collection, I remain.

Yours truly,

MRS. R. J. GEE, Powers Lake, North Dakota.

- 260. PATRICK O'MARA. Autumn shade. Claimed an improvement over King of the Autumn.

 261. PAUL MICHAEL. Old gold. Full and deep. One of the most exquisite of the Antumn shades. A grand Dablia.

 75e each.

- 54. PRESIDENT WILSON Color, crimson carmine tipped white, some blooms come all red\$1.50 each

- 420. REALIZATION. Color, canary-yellow; produces large blooms freely

 287. ROOKWOOD. Color, bright cerise-rose. Cousidered one of the best in its shade. Blooms are borne on strong, upright stem. \$1.00 each
- 291. ROTARIAN. A violet maroon of large size and equal to Kiwanis in formation. Violet-maroou bardly describes it. Very rich and soft. Kaise it and name the color yourself.

- 395. SAGAMORE (Decorative). This Dahila was first exhibited in 1921, winning the bonor of being the best seedling at the American Dahila show at New York; since that time it gold, shaded toward the center, and in the depth of the large and perfectly-formed bloom with a warm salmon-rose this Dahila very highly as seed places. S. 400 each this Dahila very highly.

- 303. SHIDOW'S LAVENDER. The very large flowers are of a silvery lavender, shading to white. In bot weather the will almost disappear. The stem is long and stiff, and holds the large flowers erect. It blooms continuously and freely slowers.
- 307. SOUVENIR DE GUSTAVE DOAZON. It is the largest Dahila in existence. Flowers are full to the center and often measure nine inches and over in diameter; they can be forced to measure over twelve inches. The color is a pleasing grover, with heavy, dark, glossy, green foliage and a remarkable constitution.

The largest and finest of this color. One of the most satisfactory garden varieties and equally good as an exhibition sort 7.30 each

Testimonial

211 Central Ave., East Point, Ga. January 6, 1929.

Jacob Schulz Co.

In the fall of 1927 I bought from your agent at the fair: 1 "Jersey Beauty," 2 "Jean Kern," 1 "Kitty Dunlap," and they proved to be fine-especially the Jersey Beauty and Jean Kern.

As I told you I had only one "Jersey Beauty" but have never seen so many large flowers from one stalk. It was the talk of the town. The stalk grew ten feet high. I guess the soil perhaps had lots to do with it, but anyway I wanted you to know what success I had with my Jersey Beauty and that I think your bulbs are far superior to others I have tried. Very best.

Mrs. W. E. Orr.

\$1.00 each; \$9.00 per doz. fragrant

COVENT GARDEN. This is a rich, deep crimson of splendid form, producing very full blooms...\$1.00 each; \$9.00 per doz.

CRUSADER. A rich, velvety crimson; fine strong growing variety, excellent flower stems anad produces very little blind wood. For its size a prollife producer.....\$1.00 each

FRANK W. DUNLAP (Dunlap 1920). At the International Flower Show, New York, this Rose won silver medal, also gold medal sweepstakes for the best new pink Rose. Claimed to be better than Mrs. Chas. Russell. \$1.00 each; \$9.00 per doz.

GOLDEN OPHELIA. Not a sport, but a seedling from the universal favorite Ophelia. A sturdy, stiff-stemmed grower with wonderful foliage, closely set and glossy. Flowerist of medium size, from a beautifully-formed but of golden yellow. Side each; \$9.00 per doz.

Pleasure to do Business

Dear Sir: May 6, 1927.

The order arrived in splendid condition, and I wish to add, it is a great pleasure to do business with people who take care of their customers in the competent way you do.

Very truly, MRS. CHARLES E. DOTY. Lakewood, Ohio.

HYBRID TEA ROSES—Continued

IIADLEY (Wahan 1915). A splendld garden variety; color, tich erimson, carrying to deep, velvey crimson. Very fragran; free producer of flowers \$1.00 each; \$0.00 per doz. IEEEN GOULD (Lambert 1998). Color, light watermelon red; very free grower; splendid bloomer ... 25 each; \$0.00 per doz.

HOOSIER BEAUTY (Dorner & Sons 1915). Well shaped, long buds; full, perfect flowers of an intense, rich dazzling crimson scarlet. Very fragrant\$1.00 cach; \$9.00 per doz.

Son Scarlet. Vy Hagian (Leenders 1910). One of the best bedding varieties. The flowers, which are produced on long, stiff stems, are of large size and of perfect form. Deep imperial pink, the outside of the petals silvery rose white.

LADY ASHTOWN (Dickson & Sons 1994). One of the finest flowering varieties in the collection, and produces perfect blossoms under all weather conditions. Splendid for cutting; color, soft rose, shading to yellow at base of petals 8.109 cach; 8.00 per doz.

MME. JULES GROLEZ (P. Guillot 1907). Clear rose, shaded yellow at base; long, pointed buds. 75c each; \$9.00 per doz.

MMS. AARON WARD (Pernet-Ducher 1997). Strong, vigorous, compact growth; the flowers are of splendid form, full double; in color a distinct flowers are of splendid form, full double; in color a distinct flower shadous flight color centife flower will sometimes come a yellow tinted white, but it is beautiful under all color variations.

PREMIER. Too well known to need description. Deep rose; fragrant and thornless; free bloomer.\$1.00 each; \$9.00 per doz.

WHITE OPHELIA. This is a sport of Ophelia. It produces a large flower with more petals than the parents and has the same qualities of growth, foliage and constitution. This is destined to become one of the most popular Roses.

8.100 ceach \$2.00 per doz.

WM. R. SMITH (Smith 1908). Color soft silvery white, shading into peach pink. Blooms are produced on good, strong stems. This is a very free bloomer.81.00 each; 89.00 per doz.

Best Catalog This Spring

May 4, 1927.

You may substitute of your own choice if not in stock any of my order. I am very much in love with your catalog. The best I have received this spring and am sure showing it to my friends.

Yours truly.

MRS. SARAH E. WADE, Edinburg, Indiana.

Polyantha Roses

BABY RAMBLER. This is the original Baby Rambler, bloom all the time. Flowers in large clusters, Color, b crimson ... 75c each; 89,00 per doz. RARY DOROTHY

BABY TAUSENDSCHOEN (Walter 1911). Flowers large and much like Tansendschoen. This is a bush form of climbing Tausendschoen or Thousand Beauties, having all the charms in the variable coloring in its flowers that its parent has 75c each; \$9.00 per doz.

the spray Store and Store

Hardy Climbing and Rambler Roses

PRICES OF CLIMBING ROSES, \$1.00 EACH

AVIATEUR BLERIOT (The New Yellow Rambler). A strong-growing plant with beautiful, glossy, insect and disease-ptroof foliage, and bearing large clusters of medium-sized full double flowers of a saffron yellow, deepening to an almost golden yellow at the center.

AMERICAN PILLAR. A single-flowering variety of great beauty. Flowers 3 to 4 linches across, of a lovely shade of plank, with a clear white eye and cluster of yellow stamens.

BESS LOVETT (Van Fleet 1905). This resembles climbing American Bennty in shape of blooms and the large foliage is very attractive. Color clear, bright red; very fragrant and one of the hardlest climbers.

CLIMBING AMERICAN BEAUTY, A strong, healthy, vigorous grower, frequently making shoots from 10 to 12 feet long, and good-sized flowers for a climbing flose that blooms so freely; Color a pleasing rose pink; of splendid form, good substance.

CRIMSON RAMBLER. Bright crimson flowers, produced in large clusters of pyramidal form. A grand variety for pillars and arches.

CHRISTINE WRIGHT (Hoopes Brother & Thomas Co. 1909). Color bright, clear wild rose pink, broducing blooms 31/2 to 4 inches in diameter. This strong climbing rose has large, thick, leathery foliage and is not subject to mildew.

DR. W. VAN FLEET, A Rose, which on account of its dainty color of exquisitely shaped huds and flowers, has become a great favorite. The long-pointed buds are a rich flesh pink, on stems 12 to 18 inches long; splendid for

Tausendschoer

DOROTHY PERKINS. A very fine deep pink. The flowers are borne in large clusters of small double blooms and are very sweetly scented.

EMILY GRAY (Williams 1918). Color clear golden yellow; flowers are double with large hnds, dark green foliage. This is a very free flowering variety.

GARDENIA (Manda 1899). Color deep, rich golden yellow; passing to creamy white. It is a very profuse bloomer. Flowers are large and splendid for cutting.

IAWATHA. A brilliant, rnhy carmine with a clear white eye and a mass of golden stamens—a glowing combination of colors, which can be seen at a great distance.

LADY GAY. ADY GAY. Delicate cerise pink, passing to soft-tinted pink. The effect of a plant in full bloom and the deep green of the foliage is indeed charming.

MARY LOVETT (Van Fleet 1915). This is a pure, matchless, white climber, producing large flowers. By many it is considered the best of the white climbers.

PAUL'S SCARLET CLIMBER. Considered one of the greatest climbing Roses grown. This is one of the newer climbers and without doubt the most important addition to the list of climbing Roses. Color vivid scarlet. Does not hurn or bleach until the petals fall.

HARDY CLIMBING AND RAMBLER ROSES-Continued

ROSERIE (Witterstaetter 1917). This variety is of the same habit of growth as Tausendschoen, same is true of its blooming qualities. Color is a more even shade of cerise pink or carmine. This is a very free bloomer and of

vigorous growth vigorous growth.

"AUSENDSCHUEN. Not stiff or unnatural, but as beautiful as a semi-double azalea. The color is a delicate shade of soft pink when first opening, changing to carmine on the reverse of petals when fully expanded. WHITE DOROTHY. Among Rambler Roses none has justly gained greater popularity than the beautiful pink Dorothy Perkins. The White Dorothy is a duplicate except in color. SILVER MOON. Different from all other Roses, with beautiful semi-double flowers 4½ inches and over in diameter; pure white in color; petals of great substance.

SHOWER OF GOLD (Paul & Son 1910). Covellow with orange shadings in the center. Color deep golden

Cannas

CANDELABRE. This is a very free bloomer, plant being ablaze with torch-like flame of orange scarlet bloom. CITY OF PORTLAND. Color a glowing pink. Flowers borne in great profusion, Green foliage. 3½ feet..35c each; \$4 per doz.

EUREKA. Very fine, white; grows to a height of 4 feet.

.....15c each; \$1.50 per doz. KING MIDAS. Color glittering gamboge-yellow, this canna produces glorious trusses on straight stems. 5 feet.......

METEOR. This is a deep red variety of robust habit. A very effective bedder, 5 feet 20c each; \$2.00 per doz.

MRS. PIERRE S. DU PONT. Claimed to be the finest of all

Mena this cama. I restriction by the property of the sufficient scarlet infusion to intensity the dazzling mass of color; very free flowering. Awarded a certificate of merit by the S. A. F. and O. H. at New York. 5 feet... 200 seach; \$2.00 per doz. ORANGE BEDDER.

SUSQUEHANNA. Color old rose pink, very attractive olive green foliage. Early bloomer. 3 feet..35c each; \$3.00 per doz.

WYOMING (Orchid-flowered). Massive orange flowers, which make a strong contrast with the rich bronze foliage. 6 feet.

YELLOW KING HUMBERT (Orchid-flowered). A sport from King Humbert, in which the foliage is green and the flowers yellow with red spots. 15c each; \$1.50 per doz.

Thanks for Extra Tuber

February 18, 1927.

I received Dahlia tubers in fine condition, for which please accept thanks. Also, I most sincerely wish to thank you for one extra tuber, not named, therefore I cannot look it up to see what it is. Yet I'm sure it's a good one. I find it pleasant to deal with you people. Thank you again for the extra. Sincerely.

> MRS, J. A. JACKSON, McCaulley, Texas.

$^{\circ}$ Hardy Perennials \sim

Don't fail to include a liberal selection of hardy perennials with your order for your garden this year. We list all the old-time favorites that will never be out of style. These are flowers that your grandmother loved and grew in her garden in the days of hoop skirts and crinolines. Schulz Hardy Perennials are healthy plants that will quickly respond to the care you give them. Plant many varieties, they'll make gay your garden.

ANCHUSA italica. A perennial of great worth. It has gen-tian blue flowers in long sprays like the Larkspur. June AQUILEGIA (Columbine). Too well known to need much

BAPTISIA australis (False Indigo). 2-3 feet. Blooms in May and June. The attractive blue, pea-shaped flowers are borne on short spikes. Will stand partial shade........ ..25c each; \$2.50 per doz.

BEGONIA, Hardy. Beautiful pink flowers. Suitable for shady places BOCCONIA cordata (Plume Poppy).

ALLIOPSIS. Flowers are rich golden yellow. Very free bloomer and fine for cutting......25e cach; \$2.50 per doz.

CAMPANULA (Belliflower). A hardy garden is incomplete without a collection of these charming perennials. 25c each; \$2.50 per doz.

CENTAUREA montana (Perennial Cornflower). Good foliage, large flowers. Bluc. June to September. 25c each; \$2.50 per doz. CHRYSANTHEMUM maximum (Shasta Daisy). Blooms are typical white Daisy form but immense in size, measuring

from 3 to 5 inches in diameter.....

Lock Varieties. An assortment of colors including white, riblow, browns, pink and red, ..., ... See each §2.250 per doc. Improved Shasta Daisy. Typical white daisy blooms but larger in size, measuring 2 to 3 inches in diameter. This is the Hartle and Elder daisy, recently originated. It is an May and could not be seen to the seed of the see pleasing25c each; \$2.50 per doz. CONVALLABIA ONVALLARIA majalis (Lily-of-the-Valley). Testimonial

Jacob Sehulz Company, Inc., Louisville, Ky. Gentlemen:-

HICKORY HILL, Thomson, Ga., April 13, 1928.

I trust you will pardon my delay in acknowledging the nice iris you sent gratis with my phlox order. You were most generous, and I thank you.

The phlox mixture came in first class condition; I have never received plants packed so earefully. I think they would have traveled around the globe in a green state.

I will remember you with future orders,

Very truly yours. JESSIE D. WATSON (Mrs. J. D.)

Papaver Oriental Poppy

Hardy Chrysanthemums

After the frost has taken all other flowers, the Hardy Chrysanthemum greets us with an abundance of blooms of various hose and colors. It is one of the most astifactory and blooms, and plants are easily grown, making a fine addition on any garden. The most satisfactory way to carry the plants through the winter is by placing them in cold frames, although relating the plants through the winter is by placing them in cold frames, although drained position and covering with a good mulching of leaves or loose litter. The varieties listed below usually begin forcing and November. All of our plants are sent out of 2¼-inch pots and we begin making delivery in April, continuing until July 1st. Price for good strong plants, continuing until July 1st. Price for good strong plants, continuing until July 1st. Price for good strong plants, continuing until August 1st. A. BARIMAN. Escutific for good price and plants.

A. BARHAM. Beautiful orange bronze. Early,
ADIRONDA. (Introduced by E. D. Smith & Co.). The best
early golden bronze. True pompon type. Matures October

ALICE HOWELL. A beautiful shade of orange yellow, Single. Early as well as free flowering. ANGELO. (Introduced by E. D. Smith & Co.). A beautiful light pink. Matures October 25th.

BOSTON. Strong, upright growth; clear bronze.

BRONZE QUEEN (Elmer Hill & Co. 1918). An even shade of golden bronze. A very free flowering and free growth. Dwarf. Matures October 10th.

CARRIE (Syn. Glory of Seven Oaks). Deep yellow. A beauty. CHALDRON. Reddish crimson with gold tips. Large flower.

CHAMPAIGN. Bright ruby red. Wonderfully colored. CHAMP D'OR. Canary vellow. Very bushy habit.

CRANFORDIA. Exceptionally early. Deep bronzy yellow.

CRANFORD PINK. Beautiful shade of light pink. DOROTHY, An early snow white variety. Vigorous,

EDEN. A bright rose. A beauty when disbudded.

HARVEST HOME. Deep bronzy yellow. Excellent. LA SOMME. Deep mauve pink.

LE PACTOLE. Produces large bronzy yellow flowers. Strong

MRS. HARRISON CRAIG. Yellow overlaid with orange crimson

NORMANDY. One of the earliest and best cream whites.

OURAY. (Introduced by E. D. Smith & Co. 1919). Dark mahogany brown flowers of medium size. Wiry stem. PETITE LOUISE. A silvery pink.

WINNETKA. (Introduced by Elmer Smith & Co. 1914).
Pure white, Very free flowering.

WOLVERINE. A seedling from Normandy but has a much heavier and stronger stem. Produces large sprays and is also an excellent variety for pot plants. Color bright yellow. Very early llowering outdoors in this locality with Nor-mandie and Carrie, about August 20th.

Auratum Gold Banded Lily

Lilies

They are most graceful in line, brilliant in delicacy of color, and of delightful fragrance. Lilies do best in the hardy border or among shrubbery, as there they get the benefit of the shade of surrounding plants which is so necessary to their welfare.

AUGUST LILY. See Funkia.

CANDIDUM (Madonna Lily). This variety is of easy culture, with plenty of flowers in June; very fragrant ... 40c each; \$4.00 per doz.

LILIES-Continued

ISMENE CALATHINA (Peruvian Daffodil). A fine Summer flowering bulb, producing large Amarylis-like, pure white, fragrant flowers. Bulbs must be kept in a dry, warm place. Plant out middle of May. Bulbs must be taken up in the Fall. 25c earl; 82.50 per dox.

LEMON LILY. See Hemerocallis.

LILY-OF THE-VALLEY. See Convallaria.

LILY-OF THE-VALLEY. See Couvallaria. REGALE (Lilium Myriophyllum). This is known as the Royal Lily of China, and is one of the finest Garden Lilies ever introduced in America. It is claimed that this is a root of the fine of the course of t

SPECIOSUM RUBRUM. White and deep pink, One bulb produces from eight to twelve flowers 49c each: \$4.00 per doz.

YELLOW DAY LILY. See Hemerocallis

Phlox

One of the most attractive of our perennial plants. Its erect stems, topped by great clusters of small flowers, puts it in a class by itself.

For border planting, there is nothing to equal the Phlox. Their brilliant blossoms are borne in great profusion and retain their superb colorings for some time, giving color and finish to a mass planting of shrubs and brightening up the dullest places.

Prices, except where otherwise noted, 25c cach: \$2.50 per doz. AURORA BOREALE. Salmon scarlet, deep crimson eye.

BOUQUET FLEURI. White, cherry red eye.

ELIZABETH CAMPBELL. Large trusses of flowers of quite a new color-light salmon, changing to pink in center. Extra

Orchid Flowered Sweet Peas

The best of the old-fashioned or Grandiflora varieties are The best of the old-inshoned or Grandhort varieties are quite distinct, having large, round, open flowers of extra-ordinary size, usually measuring 2 inches across, with way standards and wide-spreading wings and a stem which is long All the sorts offered below have been thoroughly tested and are just as easy to grow as the Grandhora varieties.

BARBARA. Beautiful rich orange-salmon. A most hrilliant color and makes a most effective bunch,

BLANCHE FERRY SPENCER. Identical in color to the popular pink-and-white Blanche Ferry; immense, wavy flowers. CONSTANCE HINTON. The most important introduction in years; of strong, vigorous growth, with enormous, wary white flowers, frequently 2½ inches across, which are borne in sprays of fours, and often fives, on long, strong stems.

DOBBIE'S CREAM. An extra-selected strain and the finest primrose yellow yet introduced; splendid in every way, with very large, wavy flowers.

ELFREDA PEARSON. This is by far the largest and finest light pink variety

FLORENCE NIGHTINGALE. LORENCE NIGHTINGALE. Nothing yet introduced in layender Sweet Peas excels this beautiful sort. Very popular,

HERCULES, A lively rose pink.
KING OF WHITE. The largest, finest and purest whiteseeded variety.

MARGARET ATLEE. Rich apricot pink on a cream ground color. Very rich, MARGARET MADISON. Opens a delicate azure hlue, develop-ing to a clear, light lavender.

. F. FELTON. Exquisite, soft lavender blue, slight suffusion of rose. Flowers large.

ROBERT SYDENHAM. This grand variety is a distinct, new color, being a glowing orange throughout; good, strong grower; flowers of characteristic Spencer size and form.

ROYAL PURPLE. Rich royal purple. One of the finest and most distinct varietics. WEDGWOOD. Bright silvery or wedgwood blue. A heautiful and popular color

Discarded All Other Bulbs

Sentember 8 1997

I ordered dablia bulbs from you this spring and am very pleased with them, now while the blooming season is at its best. I have noticed other friends and neighbors who have paid more for theirs than I did. I have discarded the hulhs that I had before I bought from you, because there was too much difference. Some I have had to bloom from 8 to 10 inches and very good blooms of your bulbs. Am making up my list for the next season to come, with Schulz's bulbs

Dahlias Blooming Heavily in October

October 20, 1927.

I am anxious for you to know how levely the dahlias are that I got from you this spring. They are being admired by many neighbors and friends, and are still blooming heavily. I am more than pleased with them. I also had wonderful success with your dahlia seeds, and have two that are especially beautiful. I shall want some more of these next year.

Very truly yours. MRS. J. C. CANTER. Flushing, Long Island.

Karl Rosenfield

Gladioli

There's nothing that goes farther toward making a home out of a house than flowers both in the garden and about the rooms. There is no flower that will go farther in beautifying the garden than the gladiolus. Their sharp vivid coloring together with varietv of form and color have made them one of the most popular flowers of today. They are easy to grow, require a minimum of attention and thrive well in most any kind of soil. The ideal way to plant them is to start in late April and plant a number each week or ten days until mid June. They will bloom in your garden from July until frost. eut flowers they are far superior to any Summer bloomer for lasting qualities. Glads hold another advantage that means a great deal to the average garden enthusiast; they are so reasonable in price that a comprehensive display may be had for an extremely modest investment. Plant them in beds or in borders, they'll start blooming after Peonies and Irises are gone. The "Kentucky Bred" varieties offered here are the pick of hundreds of varieties now on the market.

ALBANIA. Pure silvery white with edge of petals duintily ruffled; faint pink markings on the tips of petals. This is a very healthy, vigorous grower....

ALICE TIPLADY. This is considered the very best of the Primulinus on account of the large size and deli-cate color, which is a beautiful rich orange saffron.

ANNA EBERIUS. Color dark, velvety purple; throat deeper shade; very large flowers on tall, fine spikes. Greatly in demand. Early ordering advised.....loe each; 81.00 per doz. AUGUSTA A lovely and useful variety, pure white with blue anthers — re each; 75e per doz.; 85.00 per 100 AUTUMN QUEEN. Color cream yellow: apper petals suffused with peach-blossom pluk; lower petals striped earmine red — 10e each; 81.00 per doz.

BERKSHIRE. Delicate pink 20c each; \$2.00 per doz. CATHERINA. Color blue-grey, distinctly marked with browish red spots...... 15c each; \$1.50 per doz.; \$10.00 per 100

Most Beautiful Glads from Us

Enclosed please find an order for flowers and plants. I had several Glad collections last summer, the most beautiful of which came from you.

> MRS. A. M. GERMAN. Franklin, Tennessee.

Hardy Vines and Climbers

Vines bring up memories of shaded porches and moonlight; there's a touch of romance connected with them in the minds of most of us. Poets and songwriters have sought inspiration from honeysuckle, elematis and ivy. Certainly no more softening influence can be given to a house than vines planted wisely. "Kentucky Bred" vines are hardy and easy to grow. They are reasonable in price, too. We'll be glad to advise with you about the quantity or kinds that you need for your purpose.

showy. Good for covering banks and slopes when creating natural effects. Strong plants, 5e each CLEMATIS paniculata. White, sweet-scented Clematis. A very popular Summer dlowering vine. Blossoms are borne in profusion in July and August, followed by feathery seed.

Strong plants, 50e and 75e each Strong plants, 50e and 75e each

Strong plants, 50c and 75c each
HEDERA (English Ivy). Very attractive
effects are possible with this glossy,
green leaved vine, with its foliage remaining Summer and Winter......
15c each; 6 for 75c: \$1.00 per doz.

LONICERA (Honeysuckle Vine). Halliana. The rapid growing Japanese Honeysuckle. Beautiful light green foliage and many creamy white, fragrant blossoms all Summer.

Sempervirens (Red Coral Honeysuckle). Large, fleshy leaves and beautiful blossoms about two inches long. Red berries follow the foliage. Strong plants, 50e each

Polygonum Auberti

Wistaria

plants, 75e each
POLYGONUM under i (Silver Lace Vine),
growth, attaining a beight of twenty-five
or more feet, producing during the Summer and Fall great, foamy sprays of
plant, During its long period of flowing is a great mass of bloom.

All True to Name

May 8, 1927.

Gentlemen: May 8, 1927.

I received much pleasure from dahlics I purchased from you last year. One thing to your credit, they were all true to name.

MRS. B. G. ROBERTS, Gloucester, Virginia.

Hardy Begonia

This beautiful little plant thrives splendidly in a partly shaded place. It does not require a great deal of sun, but should have good daylight. We can send these plants out May 1st at 25c each; \$1.25 for 6; or \$2.50 per doz.

25c each; \$1.25 for 6; or \$2.50 per dozen

Thanks for Kindly Help

Jacob Shulz Company, Inc. Louisville, Kentucky.

I want to thank your company for their generosity in donating to the University the materials for the new arboretum. Without your aid our garden could not go forward as rapidly as it is doing. The garden is a public one and many will see it. We shall always think of your kindly help.

Very sincerely yours, FRANK L. McVEY,

President of the University of Kentucky.

Flowering Shrubs

There are any number of places around your place where flowering shrubs would fit in and not only make it more beautiful, but increase the value materially. These Schulz shrubs we offer are not only desirable for Summer, but many of them will provide color and life to your home throughout the Winter. Shrubs planted as foundation plantings add grace and charm to the exterior of your house. A hedge gives privacy and protection with beauty as well. Fence corners become beauty spots with proper planting. Read over the varieties; it's surprising how much you can accomplish with a small budget.

Write us giving a rough sketch of your home surroundings and we will be glad to recommend the shrubs you need.

AMYGDALUS nana (Flowering Almond). Dwarf. Pink and
white. About May 1st, before the leaves appear, the bare branches are clothed with a profusion of double flowers. 2 to 3 ft. \$1.50
RALIA pentaphylla (Acanthopanax pentaphyllum). A com-
ARALIA pentaphylia (Acantiopanax pentaphylium). A compact shrub, growing from 5 to 8 feet in height. Flowers greenish yellow. 2 to 3 ft
2 10 4 10
RONIA arbuitfolia (Red Chokeherry). The flowers are white-borne freely at the end of the branches and are followed by bright red berries. The shrub grows from 3 to 5 feet high. 3 to 4 ft. \$8.75 4 to 5 ft. 1.100
ERBERIS thunbergi (Japanese Barberry). A splendid shrub for low hedges and for masses in landscape work. In Autumn the foliage changes to orange and crimson, while brilliant red berries cover the bushes in Winter. 1½ to 2 ft
SUDDLEIA variabilis magnifica (Butterfly Bush or Summer Lilae). Flowers resemble Purple Lilae in both shape and color. Especially fine for cutting. They grow to a height of 4 to 5 feet and flower from July to frost

New Red-Leaved Japanese Barberry
A worth-while outstanding novelty in hardy shrubs. Foliage a rich, lustrous, bronzy red. Color more brilliant
throughout the Summer, changing to orange, scarlet and a liveller red in the fall. Brilliant scarlet berries through-

Evergreens

Evergreens are indispensable to a well rounded planting scheme. The main point in their favor is the fact that they provide a warm, live green color during months when no trees and only a few shrubs show any color at all. Evergreens are ideal for windbreaks, for ornamental planting, both formal and informal, and for a screen to shut out any undesirable view. Schulz evergreens are well known for their exceptional hard iness and fine appearance. We exercise extreme care in growing and are especially careful to pack and ship so that the tree is in the best possible condition when it reaches the customer. Turn to the center spread and note the care with which the man is digging and burlapping the small evergreen. Every tree gets the same attention.

Irises a Big Surprise

Dear Sirs:

April 18, 1927.

My trises ordered from you were a big surprise to me and I know they will surprise others who order as I did. They were planted and bloomed the same season. The rhyzomes were all large and healthy, and I sure thank you for the attention given my order. I am sending you an order for dahlas and I know they will be Schulz Quality, as always. Thanking you for service rendered, I remain,

GEORGE A. SMITH, St. Louis, Missouri.

At the left is a picture of Mr. Smith's Iris Garden. Note the Irises in front are through blooming while those at the rear are still in flower.

Making the Neighbors Envious

May 2, 1927.

Gentlemen:

The Iris I received from you last fall are in bloom now and I must say they are certainly making the neighbors envy me. I am sure you will get some orders from them as they want to know where I got them.

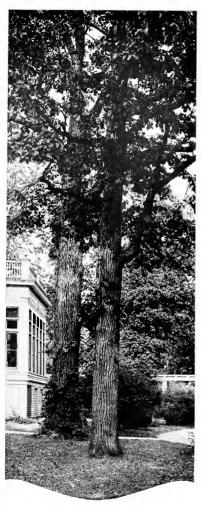

Yours truly.

HENRY N. CONWAY, County Surveyor,

Little Rock, Arkansas.

At the right a snapshot of Mr. Conway's Irises.

Shade Trees ~

{ Deciduous Trees }

Nowhere are more beautiful or desirable trees to be found than the grand old specimens of our American forests. If you want to add greatly to the permanent value of your place, plant shade trees. Like every other good thing, they take some time to grow, but they will repay you a thousand times for the time you wait in grateful shade in Summer and glorious Autumn colors. We list all the old favorites that you know so well and also many other trees that you may not be so familiar with.

ACER platanoides (Norway Maple). Generally considers the best street and shade tree, as it is entirely hardy growing even under adverse conditions. 8 ft. 14 to 1½ in. caliper. 10 ft. 1½ to 2 in. caliper. 4.5 If ft. 1½ in. caliper. 6.0
Saccharum (Sugar Maple). A typical American tre used for street and lawn planting. Its foliage is darl green on the upper side and light on the under surface and in Autumn takes brilliant shades of red and orange 5 ft. 14 in earlier. \$3.5 12 ft. 12 in earlier. \$4.5 12 ft. 2 in earlier. \$6.0
Sacelarinum (dasycarpum) (Silver Maple). A tall-grow ing shade tree with spreading branches, lawn specimen than for street planting. Better as it is shaded in the street planting. S ft. \$1.5 t. \$1.5 t.
BETULA alba laciniata pendula (Cut-leaved Weepin Birch). Long, drooping branches and deeply green foli age. The bark turns white as it reaches maturity 5 to 6 tt
Iutea (Yellow Birch). The bark is very thin and toned with silvery grey. 5 to 6 ft. \$2.0 6 to 8 ft. 3.0
CATALPA bungei (Round-headed Catalpa). Used chiefly in formal gardens and to border driveways. 1-yr. heads \$2.0 2-yr. heads 2.50 3-yr. heads 5.0 3-yr. heads 5.0 5.0
CERUS canadesis (Judas Tree). Native tree with red dish purple flowers in early Spring; of medium height according to the state of the
CORNUS florida (White-flowering Dogwood). A bushy tree or tree or large shrub with pure white flowers in early 3 3 10 ft. \$1.5 4 10 ft. \$2.0 5 10 ft. \$3.5 5 10 ft. \$3.5
Florida rubra (Red-flowering Dogwood). Most effective when planted with preceding variety, as the bright pink blossoms are enhanced by the contrast. 18 inch \$3.00 24 inch 3.56
FRANINUS americana (White Ash). A desirable shade tree which grows naturally in the central portion of the United States. The green foliage changes to purple and yellow in Autumn. 7 to 8 ft. \$2.06. 8 to 10 ft. \$3.06.
KOELREUTERIA paniculata (Varnish Tree). Introduced from China. Bears yellow flowers in July wnich contrast beautifully with the deep green follage. 5 to 6 ft. \$1.50 6 to 8 ft. \$2.00
MAGNOLIA acuminata (Cucumber Tree). The yellowish green flowers open in May and June, followed by rosy red fruits. Upright in growth; a valuable stade tree. 6 to 7 ft

SHADE TREES-Continued

MAGNOLIA GRANDIFLORA. This is the Southern Magnolia, producing large white fragrant flowers and beautiful glossy leaf. 1½ to 2 ft
3 to 4 ft
MALUS ioensis Bechteli (Betchtel, Double-Flowering Crab Apple). Double blossoms, deep pink in bud, opening light pink. A beautiful variety, which in fragrance sends everyone into raptures. 3 to 4 ft. \$2.00 4 to 5 ft. \$2.00
POPULUS carolinensis (Carolina Poplar). An exceedingly rapid-growing tree, widely planted where quick effects are desired, but of little permanent value. 8 to 10 ft
Nigra italica (Lombardy). This is chiefly used for backgrounds,
windbreaks, etc. 8 to 10 ft \$1.25 10 to 12 ft 1.50
QUERCUS palustris (Pin Oak). The Oak thrives best on soils which are free from lime. The Pin Oak is most charming as a specimen tree. The foliage is deep green but in Autumn changes to scarlet. 6 to 7 ft. 3.00 7 to 8 ft. 3.00 8 to 10 ft. 4.00
SALISBURIA adiantifolia (Ginkgo biloba) (Maidenhair Tree). In- troduced from China. A picturesque street or shade tree, reaching its highest type of beauty with extreme age.
6 to 8 ft. \$3.00 8 to 10 ft. 5.00
SALIX babylonica (Weeping Willow). Picturesque tree with slender, drooping branches covered with tapering foliage, bright green in color.
7 to 8 ft. \$2.50 8 to 10 ft. 3.50 10 to 12 ft. 5.00
Caprea (Pussy Willow). A small tree with upright branches, which in early Spring are covered with catkins or "pussies." 4 to 5 ft
TILIA americana (American Linden; Basswood). A splendid tree for street, lawn, and park planting. Broad, heart-shaped foliage, dark green on the upper side and lighter green underneath. 8 to 10 ft

Bechtel Double-Flowering Crab Apple

For Better House Plants

On the hot Summer days you long for shade, Oaks, Maples, Lindens, are among the best lawn and street trees.

use PlanTabbs, ideal for potted plants. Odorless, simple, easy to use. PlanTabbs will help make your house plants healthier and more beautiful. Healthy Looking

April 14, 1927

Gentlemen: The Jersey Beauty dahlia bulb received and am very much pleased with it. It is such a healthy looking bulb. Please accept my many thanks for same

MRS. GEORGE K. GODDARD Lexington, Kentucky.

Is Gardening Your Hobby?

In THESE days of hustle and bustle when living goes so fast, work claims most of our time and attention. There is an old saying, "All work and no play makes Jack a dull boy." It applies to business men and housewives today just as it does to children. We all need an avocation or hobby to go along with our regular work. It is good to come home from the office or the shop from the every-day grind and to forget it all working in the soil, planting, cultivating and caring for growing things. You don't need a big space to have a garden that you can really enjoy. You can accomplish wonders in a limited space. It may be only a few square feet, but planned judiciously, it will give a great deal of pleasure and beauty.

Gardening is a real exercise. It is a change that everyone needs. It has always seemed a garden is the soul of the home. Without a garden, the home lacks something. Beautify your home outside with beds and borders, inside with cut flowers all through the season. The garden makes a wonderful place for your children to live and play in during the warmer months. The garden brings happiness, health and satisfaction.

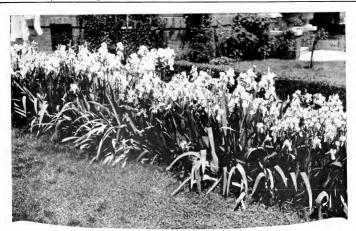

Your Home is Worth More

A small investment in trees, shrubs, plants and flowers will increase the value of your estate as much as 25 per cent. Notice the houses that you see along the streets of your town, village or city. Those that have grounds artistically planned and carried out are the nicest homes, the homes you would care to live in. Ask your real estate man about it. He will confirm our word. Don't forget our landscape offer. We will be glad to plan your home grounds in order to make them more beautiful and attractive. The best part of it is, when you buy plants, shrubs or trees from Schulz you don't have to spend a fortune for them. Our direct selling plan saves you money. You cannot buy equal quality for less price any place.

Courtesy American Face Brick Assn.

Proper Plantings Help Make This Beautiful Home

Tris ~

AURORA. S. and F. pale lavender-pink, orange beard ...

For delicacy and exquisite combinations of color there is no flower that excels the Iris. Connoisseurs and garden enthusiasts find a wealth of pleasure and interest in the hundreds of shapes and colors of Irises. Many have referred to it as the poor man's orchid. The varieties we offer are some of the most popular and highly treasured of the known kinds.

Hundreds of our customers have written us telling of the wonderful results they get from "Kentucky Bred" rhyzomes. There is something in the exceptional climate and soil of our Louisville location that makes for hardier and more beautiful plants. Try for yourself, you'll find that Irises from Schulz have an added touch of beauty lacking in many others. Learn to know the better varieties of these aristocrats of spring flowers. Study their description before ordering. Get the color and kind that will most suit your taste and needs. Plant them in borders, or clumps, they will thrive under many adverse conditions. Note in the descriptions given hereafter.

Never Received Such Large, Healthy Rhyzomes

Dear Sire

August 30, 1927. I received the first shipment of Iris and I want to say that for a collection offer and priced as they were, that they were fine. In fact, I have never before received such large, healthy looking rhyzomes. This will verify the statement you made in reference to shipping better rhyzomes than could be procured from any other source. I am very much pleased and look forward to some beautiful blooms. Thanking you, I am. Very truly yours, L. N. GOLL.

IRIS-Continued

OPERA (Velm, 1916). 30 in. S. bright, rich pansy violet, shading to brownish violet at base; F. a rich, velvety violet-

ORIENTAL (Pallida). S. clear blue; F. rich royal blue with a heavy, bright orange beard, forming a striking contrast...

ORIFLAMME. S. dark lavender: F. rich violet-purple. This variety produces bandsome blooms, and is a favorite.50c each PARC DE NEUILLY (Pallida). 28 in. 8. and F. a navy blue of reddish tinge, with an ever-changing effect..... 35c each

PARISIANA (Plicata). 28 in. S. lavender-pink, mottled all over; F. creamy white, center heavily bordered with lavender-pink

(Pallida). S. and F. unusually large, rich pansy violet, deep orange beard fragrant35c each PEAN ROUGE (Cayeux, 1923). 24 in. S. cop-pery red, faintly shaded with violet; F. bronzy blood red, beard light brownish

PERFECTION (Neglecta). 30 in. S. fresh lavender, flecked with deeper shade; F. rich, velvety lavender; dark reflections. A pleas-ing and highly attractive bicolor.... 25c each

PHYLLIS BLISS. S. and F. pale rosy laven-der, very beautiful in form, and a strong\$1.00 each

POCAHONTAS (Plicatum). Orchid type flower, with frilled petals. S. and F. pure white; standards faintly bordered with Orchid type pale blue35c each

POWHATAN (Pallida). S. light bishop vio-let with deeper border; F. deep purple, shaded crimson. Large, horizontal spread-

PRINCESS BEATRICE, Self. Between light and lavender-

PROSPER LAUGIER (Squalens), 30 in. S. fiery bronze; F. velvety ruby-purple, like a pansy bloom. This new bronze yariety outclasses them all, having a harmony of correctly

QUEEN CATERINA (Stur, 1918). S. and F. very broad, pale lavender-violet; flowers of large size and heavy substance..\$1.00 each

RED CLOUD (Squalens). S. rosy lavender-bronze; F. velvety maroon-crimson, reticulated yellow; stigmas of gold.35c each

ROSE UNIQUE. S. and F. bright violet-rose, the nearest approach to a pink iris. Early......25e each ROSEWAY (Bliss, 1919, Pallida). Bright red with orange

SAUL (Denis). S. golden yellow; F. maroon, with darker

veining at the haft......\$1.00 each

SOUV. DE MME. GAUDICHAU (Millet). An early, deep pur ple bicolor of an unusual velvety appearance..... \$1.00 each

SUNSET (Denis). 30 In The nest conderful coloring of this SUNSET (Denis). 30 In The nest conderful coloring of the fine part of the part o SUSAN BLISS (Bliss). This is a uniform shade of deep rose

SHREWSBURY (Squalens). S. rosy bronze; F. violet-purple, with lighter shadings. The conspicuous, heavy orange beard forms a brilliant contrast with the other colors. A unique variety35c each

THE BRIDE. S. and F. white, primrose beard; very large and handsome ...

TROJANA (Syn. Cypriana and Aisatica). Pale blue standards; very long, rich purple-blue falls. Late flowering. Resembles Pallida but is larger and later flowering. 25c each bles Pallida but is larger and facer movering.

TROOST. S. deep rosy purple; F. paler veined violet, A decleided improvement over "Her Majesty".

TROPIC SEAS (Shall, 1921). 50 in. S. Dauphin's violet; F. velvety mulberry-purple and rich golden beard. Produces large flowers.

VICTORINE. 27 in. S. mottled blue; F. violet-blue, mottled white; beautiful variety .25c each VIOLACEA GRANDIFLORA (Pallida). 32 in. S. and F. fresh, clear violet. Massive and blooms late. Desirable, but

not sufficiently appreciated.....

WALHALLA, Lavender: F. wine-red., 35c each WHITE KNIGHT (Saunders, 1915). A beau-tiful snow-white Iris without markings of any kind. Delicately sweet scented .50c each WINDHAM (Farr). 20 in. S. soft lavender-pink; F. heavily veined with darker shades

......35c each WYOMISSING (Amoena). S. creamy white, suffused delicate soft rose; F. deep rose base, shading to flesh-colored border.35c each ZUA. S. and F. pale lavender-white flowers, heavily crimped like fine crepe. Blooms are very beautiful, large and fragrant. 50c each

Dwarf Bearded and Beardless Iris

BIFLORA (Dwarf Bearded). S. purple, with attractive markings; F. dark blue...25c each BUTTERFLY (Dwarf Bearded). Pale yellow, spotted brown; desirable. Dwarf...25c each

CHELLES (Germanica). S. bright golden-yellow. F. bright FIEBERI (Dwarf Bearded). Deep violet-blue. Large and handsome25c each

LONGIPETALA (Beardless).

ONGIPETALA (Beardless). True S. violet-blue; F. white, with lilac veining, gold and bronze spots. Very free blooming

NUDICAULIS (Dwarf Bearded). S. violet: F. purple-black.

OCHROLEUCA (Syn. Orientalls Gigantica). The gold-banded 1ris. Grows 5 feet with strong follage; large trory-white flowers, orange-yellow, blotched at base of falls....25c each

OLBIENSIS, Socrates (Dwarf Bearded). Bright claret-red; F. deeper scarlet, beard yellow. Handsome.......25c each PSEUDACORUS.

PUMILA HYBRIDA, SCHNEECUPPE (Snow Cup). (Dwarf Bearded). Large flowering white; F. slightly reticulate.

Siberian Iris

ORIENTALIS (Sibirica). 30 in. S. and F. intense deep blue, with narrow foliage. Suitable for naturalizing..... ORIENTALIS, BLUE KING, Clear blue flowers. Found by

ORIENTALIS, SNOW QUEEN. Large ivory-white flowers ..

ORIENTALIS, SUPERBA. Large violet-blue flowers; hand-

SIBIRICA ALBA GRANDIFLORA. Flowers very large, pure

SIBIRICA, DISTINCTION. S. violet; F. white, freely veined and tipped blue25c each

Raise your own seedlings. Plant them in Fall or Spring. 50 seeds for.

Planting and Cultural Directions --Schulz "Garden Tips"

Roses The most important factor in successful rose culture is the soil. Roses prefer heavy soil, although with proper care, they can be grown in light soils. The bed preparation is similar to the prepain light soils. The bed preparation is summar to the preparation for other plants, being worked to a depth of 18 inches. A well-prepared, heavy soil feels crumbly when taken in the hand. This crumbly structure is easily maintained by frequent cultivation at times when the soil is not soaked with water. Well-rotted manure is the best fertilizer for roses, and should be worked into the soil before planting. Although much moisture is required for rose culture, they will not stand "wet feet" of standing water. Artificial drainage may be necessary.

Planting

When the roses arrive, unpack them immediately. If they can not be planted at the time, they may be "heeled This consists of digging a trench, in which the plants are placed in a slanting position, close together, and soil packed around the roots to keep out the air. The roots will need lots of water, to be sure that none dry out. If you have ordered a goodly number of plants, it is advisable to heel them all in before planting, and then remove a few as needed. The important thing is to keep the roots damp or wet. A dried root will die.

Plant the roses about two inches below the crown, or below the point where the first branches rise. Be sure the roots are well spread, and that the soil is well packed around them to keep out the air. Water each plant thoroughly. Hybrid perpetuals may be planted 2½ to 3 feet apart; teas 1½ to 2 feet apart, and ramblers 5 to 6 feet.

Cultivation

During the growing season, keep the top soil well worked, and in dry weather, give enough water to reach the bottom roots. Roses are usually pruned in April, when the weak shoots are cut out, and the growth of the strong ones are cut back considerably. Always cut to an outside eye. It is better to prune Tea Roses the latter part of April. Leave 3 to 4 strong branches with 4 to 6 eyes on each branch.

Courtesy American Face Brick Assn

The "Home Sweet Home" house, used as a model home in Better Homes demonstrations throughout the country. The charming border of old-fashloned perennials is thoroughly in keeping with the architectural style of the house.

Perennials Like most other garden plants, the perennials do best in a rich, moist soil, where there is plenty of sunlight. A good seed bed preparation, with plenty of manure,

and constant cultivation after the plants are up, all help with the success of the garden. Enough kinds should be season, at the same time avoiding striking color contrasts. A richer effect may be had by planting in groups of five or more of a kind, rather than singly.

The distance between plants will vary with the size and effect desired. The larger plants, of course, will have more room. Good planting seasons are in April and May or September and October.

Frequent cultivation and watering will help perennials. It is advisable to cover the bed with a few inches of straw in the winter, to guard against alternate freezing and thawing. This may be applied after the ground has

Peonies Peonies will thrive in most any soil, providing it is well fertilized and worked up. Good soil preparation consists in dig-ging it up to a depth of 18 inches and mixing in about 10% of well-rotted manure and leaf mold. A deep, loose soil for planting holds the moisture longer, contains more air, and gives the roots a better chance to spread out and find nourishment. All of these are essential to successful garden culture. It is easier to keep soils in a "friable" condition when there is plenty of organic matter present, such as manure and leaf mold. These are necessary both for their plant food and their physical aid in cultivation.

Planting

Peony roots may be planted in early spring, as soon as the frost is out of the ground, or in the fall. If planted in the fall, they will need protection their first winter. A covering of four inches of leaves will serve very well. Plant the roots about three inches deep in the well-worked seed bed, from 2 to 3 feet apart.

Cultivation

Peonies are very hardy and will need no winter protection after their first winter. In fact, they will grow and give beautiful blooms with only the minimum care the year around. However, they respond to the careful cul-tivation of the garden lover with larger and more bril-liant flowers. The essence of this cultivation is to keep the soil rich and friable, beginning in early spring, as soon as the ground becomes workable. Well-rotted ma-nure or bone meal may be worked into the soil to a depth nure or bone meal may be worked into the soil to a depth of two inches in the spring, being careful to keep any fer-tilizer away from the crown. Peonies like plenty of watering. If large flowers are desired, pick off the lateral buds. This throws the strength into the top buds.

Sorts I Wished for Most

August 26, 1927.

The Iris roots arrived this A. M. Wish to say the roots are fine. I am very much pleased. Thanks ever so much for the nice selection. Just the sorts I wished for most. Respectfully.

A Good Example of Base Planting to Fit In with the
Architecture of the House

Gladioli

A good, rich loam soil is best for "glads." A little effort in fertilizing will be amply repaid in the abundance of blossoms. For heavy soils, plant the bulbs four inches deep, and for lighter soils, five to six inches deep. A

good way is to dig row or bed to the desired depth, thoroughly pulverizing the soil in the bottom, and working in well-rotted manure, or a liberal amount of good fertilizer. Hen manure will give good results, but is rather strong, and should be covered with an inch of fine soil. Plant the bulbs and cover to the desired depth.

Cultivation

As soon as the shoots poke their heads through the ground, cultivation may begin. Cultivation at least once

a week until flowering time will aid materially in the size and number of blossoms. Watering also helps, especially during dry spells.

In the fall, after the stems have turned brown, the bulbs may be dug and stored in a cool cellar for the winter. Frost or drying heat will kill the bulbs. After they have been stored six weeks, the tops may be cut off.

Irises

The sunny, well-drained locations are best for Irises. The soil, of course should be rich. Manuring, or other fertilizers such as bone meal or finely ground limestone may be worked into the soil, but kept away from the Rhyzomes. The plants will not live in standing water, or a wet soil.

Planting

After the bed has been well prepared, plant the Rhizomes just below the surface, spreading out the roots, and packing the dirt well around them. Irises are always planted shallow, and are injured by manures and fertilizers that are too strong. Although the best time to plant is August and September, giving the roots time to develop before winter, they may be planted any time of vear, except when in bloom, or when the ground is frozen.

Cultivation

Irises are very hardy, and easy to cultivate. They will, however, respond to oceasional cultivation and fertilization. Since Irises naturally multiply into large clumps from season to season, making it hard to keep out the grass and root rot, it is advisable to dig them up every four or five years, separate, remove the weeds, and reset. The best time to do this is after the blooming season.

Evergreens

On the whole, sandy soils are best for evergreens, although only a few are adapted to poor soils. They prefer a view well drained conductions

a rich, well-drained, sandy loam. The one thing to watch in transplanting evergreens is to keep the roots wet. If they are a little dry when they arrive, wet them, and keep them well dampened until they are in the soil, and follow the planting with plenty of water. If they can not be planted the day they arrive, dig a trench and cover the roots tightly with burlap and rew inches of dirt and water. To plant, dig a hole until there is just room enough for the roots. Place the tree in the hole, and remove the bug after it is in. Spread out the roots if they are not in a ball of dirt. Fill directly the state of t

Base Planting Brings Out the Beauty of This Home.

Shade Trees and Shrubs

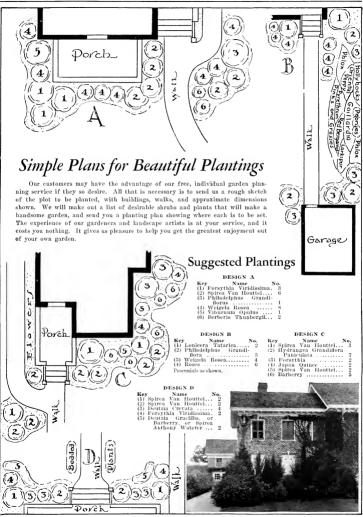

Deciduous tree requirements are very much the same as evergreens, except that there is more variation in soil requirements. However, a rich soil, with plenty of watering, is desirable in all plants. If the trees are large and are likely to be blown over easily, it is best to brace them with

have the tree well protected where the wire is fastened. Prune the tops after planting. Cut out interfering branches and about one-third of the previous year's growth.

Natural Planting of Trees and Shrubs Adds Much to the Charm of This Home.

Read This -- It's Important

How to Order

Use our order blank. Please write plainly your name, post office address and state. Always tell us how you want the goods to be shipped. Name your express or freight station. De not write regular letters on our order blanks. With them separately. Always glad to know just what you have in mind. Perhaps we can help you determine what is wisest course to pursue. Note: When ordering Dahlias, always give number as well as name of the variety.

Order Early

All orders received by us are filled in rotation. Ordering early will insure the reservation of varieties that later may be sold out and save you disappointment. We do not substitute unless authorized to do so.

Time of Shipment

Unless you give a specific shipping date, your order will be shipped to arrive at the proper time to plant in your locality. If you wish your order shipped at any special time, please so advise us.

How We Ship

We prefer shipping by express, customer to pay the charges. If you prefer sending by parcel post, postage to ever parcel post charges must be included in your remittance. Shrubs, evergreens, perennials and rose plants we will ship by express collect, unless you direct us otherwise and include postage. On dalhia bulbs we prepay the postage and in certain advertisement offers we specify "postage paid." All other commodities go to our customers collect.

Our Guarantee

We guarantee all nursery stock furnished by us to be first class and true to name. We exercise the greatest of care to have all of our trees, plants and shrubs true to name, well grown, packed in the very best possible manner and hold ourselves in readiness, upon receipt of proper proof, to replace all trees and plants that may accidentally prove untrue to label free of charge or refund the amount paid. We do not guarantee stock to grow or results otherwise in any way. No complaints will be entertained that are not made immediately upon receipt of stock.

Accuracy of Description

All descriptions and other matter in this catalog will be found as nearly in accordance with actual facts as is humanly possible to write them. Great care has been taken to avoid exageration in descriptions of varieties. The varieties you select are always sent, unless you grant permission to substitute. If you wish a particular color rather than a particular variety, many times it is to your advantage to mention the fact as we may oftentimes improve upon your selection, with your permission. Therefore, if a substitute is acceptable, be sure to so advise us as otherwise everything is shipped absolutely as ordered.

Our Customers Are Our Friends

Obviously it is impossible for us to visit the homes of all of our customers, but we are always glad to hear from them and always glad to help them in their selections, or to advise them as to the proper methods of planting and eleture. It is the human interest in business that adds greatly to its satisfaction. We want your order, but we are just as much concerned about your success in producing to your entire satisfaction. If, after you have gone through this catalog carefully, you fail to find what you want, or are uncertain about your order, write us your plans and we will gladly advise with you as far as our ability will permit. May we ask you to place your order now? We will fill it at the proper time.

Thanking you for your patronage in the past and inviting your continued favors, we are,

Very truly yours,

JACOB SCHULZ COMPANY, INC.

Oyama Plant Food

Makes plants grow. This is a Japanese plant food which we have handled for several years and the many repeat orders we get on this commodity is convincing proof that it gives universal satisfaction. 30c per pkt.; by parcel post, 35c per pkt.

Wizard Brand Sheep Manure

We recommend Wizard Brand Sheep Manure for general use in growing all kinds of plants. Nothing finer for the lawn or for soil that needs fertilizer. 2 lbs., 20c; 5 lbs., 40c; 10 lbs., 75c; 25 lbs., \$1.25; 50 lbs., \$2.00; 100 lbs., \$3.50.

Above prices not prepaid.

Black Leaf 40

A preparation of tobacco-nicotine and sulphate. Used for spraying roses or any other plant life that is subject to attack by insects or parasites. 1 oz. bottle by parcel post, 40c.

Why Raise Roses to Feed Bugs?

Melrosine—the best remedy—endorsed by leading authorities. The General Contact Insecticide that Kills Rosebugs and other insects. Used with any good spray pump, allusted with from 20 to 25 parts of water. Pleasant and harmless to use. Guaranteed effective when used according to directions on can. Plint, \$1.00; trial size, 50c. by mail or express at eustomer's expense. Trial Size (sufficient to make one gallon when diluted and care for several plants for the season) postpaid for 60c.
